Dissemination and exploitation of results are crucial areas for the SEEDS project lifecycle, giving to participating organisations the opportunity to communicate between them and share outcomes and deliverables and outside of the consortium, thus extending the impact of our projects, improving the SEEDS project sustainability and justifying the European added value.

SEEDS consortium is aware that Facebook, LinkedIn and Instagram are very popular and, in this regard, created and made functional on each of these 3 dedicated SEEDS project pages, maximizing the dissemination channels Offred by these valuable channels of raising awareness. On all these types of platforms news spreads easily throughout the entire network, frequent reminders are possible and also getting feedback is very easy. These tools make dissemination to have a European dimension, even more.
