GROWING SUSTAINABILITY: RAISED-BED GARDEN IN FES

In the first phase of Morocco's Living Lab, IBA and CTNC established a raised-bed garden in Fes, introducing sustainable farming practices. This hands-on initiative focused on efficient land use and soil health, laying the foundation for innovative agricultural solutions in the region.

FROM SOIL TO STRATEGY: TRAINING FOR SUSTAINABLE GROWTH

The second part of the Morocco Living Lab, led by PAMEA and SELFHOOD in Rabat, focused on interactive training in Healthy Farming and Entrepreneurship. Participants explored regenerative agricultural techniques and learned to transform these practices into viable business plans, equipping them with the tools to innovate and inspire sustainable farming and entrepreneurship in their communities.

Together, these initiatives demonstrate the transformative power of non-formal learning and collaborative training, equipping participants with skills and vision to lead sustainable change in their communities.

SEEDS OF INNOVATION: ADVANCING SUSTAINABILITY IN MOROCCO

✚ Morocco Living Lab unfolded in two impactful stages, blending practical implementation with dynamic learning. In the first stage, IBA and CTNC established a raised-bed garden near Fes, introducing sustainable gardening techniques. This was followed by an interactive training session near Rabat, led by PAMEA and SELFHOOD, which focused on Healthy Farming principles and Entrepreneurship. Together, these stages provided participants with essential skills and knowledge to drive sustainable agricultural practices and foster innovative business ventures.
