

## ROOTS OF SUSTAINABILITY: ADVANCING REGENERATIVE AGRICULTURE, AND INNOVATION

IBA and CTNC focused on equipping participants with practical skills in regenerative agriculture, sustainable food, and RES solutions. Through hands-on sessions, participants learned innovative techniques to improve and optimize farming practices, and create sustainable systems tailored to their local contexts.

## HARVESTING OPPORTUNITIES: HEALTHY FARMING AND ENTREPRENEURIAL GROWTH

PAMEA and SELFHOOD, focused on offering insides of Healthy Farming principles, benefits and practices, paving the path and fostering entrepreneurship in the agricultural sector. Participants explored sustainable farming techniques while developing business plans and related strategies tailored to regenerative agriculture.

The highly interactive sessions offered practical tools to manage healthy farms and transform innovative ideas into potential successful agro-entrepreneurial ventures.

## EMPOWERING WOMEN: NURTURING INNOVATION IN EGYPT

γ Egypt mobility, held at the GrEEK Campus in Cairo, organised by TWB, combined hands-on training and entrepreneurial development to empower young women in regenerative agriculture. Over eight days, participants explored innovative farming techniques, resource-efficient solutions for small farms, and sustainable food production, finalised with Youthpasses certificates. The program culminated in the establishment of the Egyptian Experimental RE-GEN Entrepreneurs Incubator, equipping attendees with the skills and tools to lead impactful change in their communities.
